

"There are two important reasons, for which we have selected Nevron Software:
They supported all charting options we needed and their support response is fast and very helpful."

Introduction

Business Analyze is a Norwegian software company, established in 2002. Since the start of the company we have successfully delivered our BI solutions to many small and large companies, leading across different industries, including the public sector.

Business Analyze's goal is to give our customers an easy and transparent day. By developing solutions, which measure and visualize the business, our customers will always have an answer to the question: *"What's going on?"*

Analyze PRO – project

In 2011 we launched our new BI-tool, a self-service analytics platform, after many years of development. It provides to our customers full freedom of choosing the level of ambition regarding their BI solution and the opportunity to decide how much of the deployment and development work they will be doing themselves.

World Class solution

Business Analyzes Business Intelligence tool **Analyze Pro**, represents the next generation in Business Intelligence. It has been developed in cooperation with Business Analyze's partners, customers and the government organization [Innovation Norway](#).

Analyze Pro is the BI-tool that gives you overview whenever you want! The solution consolidates relevant data from multiple sources into a single application. Analyze Pro is quickly connected to your existing systems and uses their data in dynamic dashboards and analysis.

Analyze Pro's powerful and engaging visualizations and graphics helps the user explore their own data in a new and meaningful way. Analyze Pro combines the business users' need for ease of use and flexibility on the one hand, and IT's need for standards and control on the other.

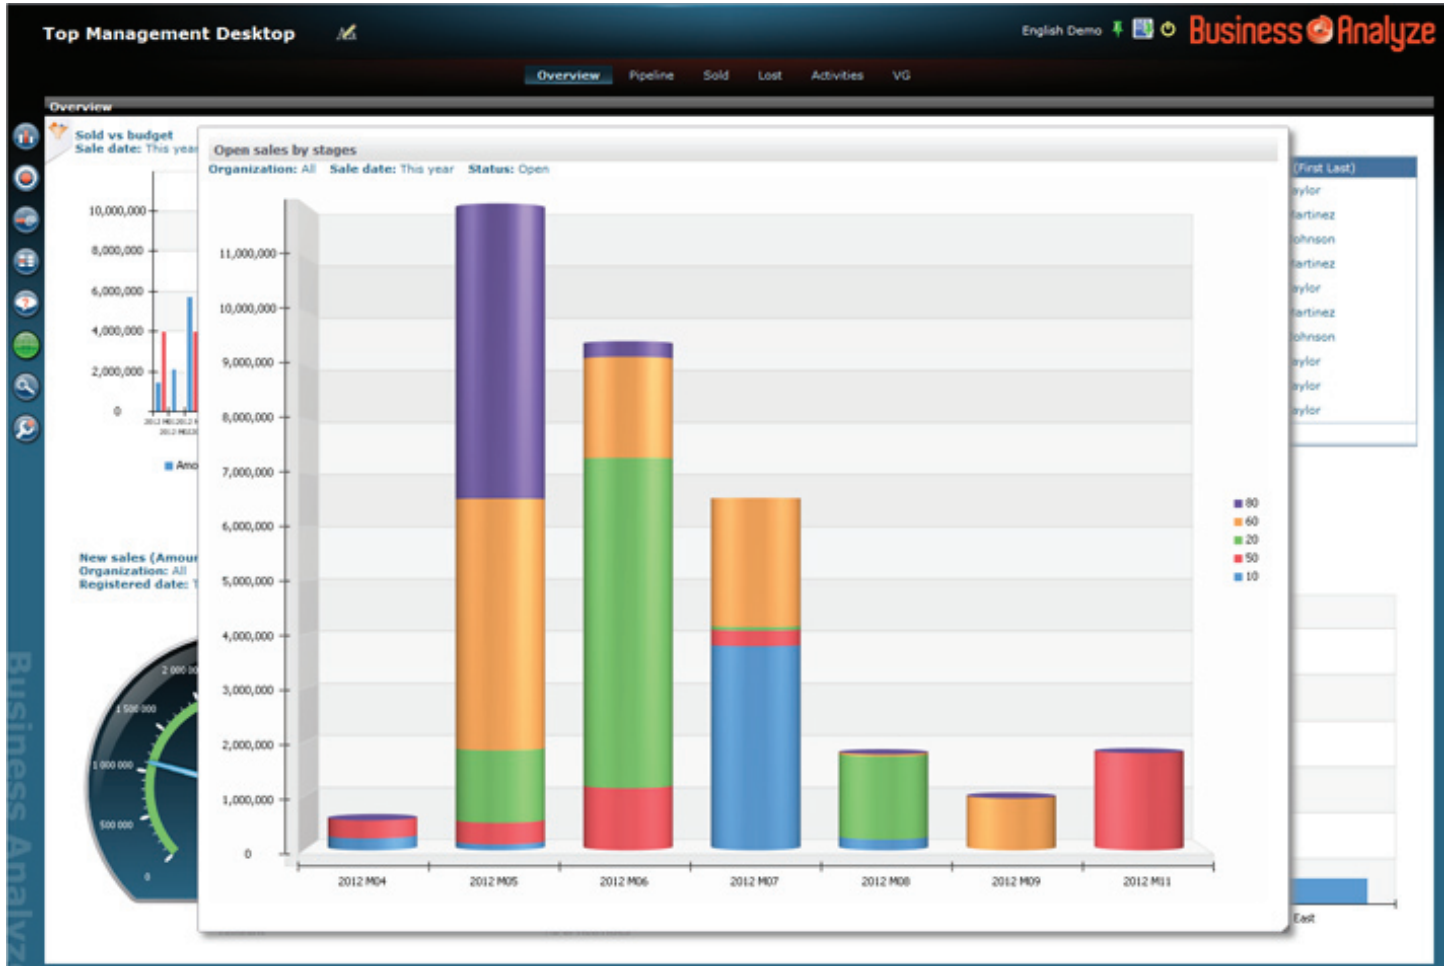

The Analyze PRO platform – constructed for everyone!

"There are two important reasons, for which we have selected Nevron Software:
They supported all charting options we needed and their support response is fast and very helpful."

Why Analyze Pro?

- Fact based decision making. Overview - whenever you want, even if you are not a daily user of the actual systems/sources, which the data is collected from.
- Visualize KPI's. Create focus, inspiration and enthusiasm around important areas of the company, helping the implementation of plans & strategies
- Very user friendly. It works as a modern web-based solution should do. By using the Analyze-function you can perform the most advanced analytic tasks in a simple way.
- Accessible at all times. No waiting for outdated reports, no more guessing. Only real time information, fast answers to critical business questions. The solution is accessible through your web-browser wherever and whenever you want.

Web-based designer (WYSIWYG) for designer (for the IT-user to business users)

"There are two important reasons, for which we have selected Nevron Software:
They supported all charting options we needed and their support response is fast and very helpful."

Flexible and scalable

Expand the solution as the need arises. Start with one data source and expand as you go along. Make all the reports on your own, make some of them yourself or get it all in a turn-key delivery from one of our partners. Select level of ambition through the different license types from User to Designer and finally Developer.

Self Service Analytics

Analyze Pro's powerful data visualization capabilities allow the business user to view their own data in a simple and meaningful way.

Example of a dashboard

"There are two important reasons, for which we have selected Nevron Software:
They supported all charting options we needed and their support response is fast and very helpful."

Value quickly delivered to organization.

Analyze Pro has a very short implementation time. The first reports can be made and used in a matter of days instead of the traditional BI initiative's that take months and sometimes years.

Design, development and roles

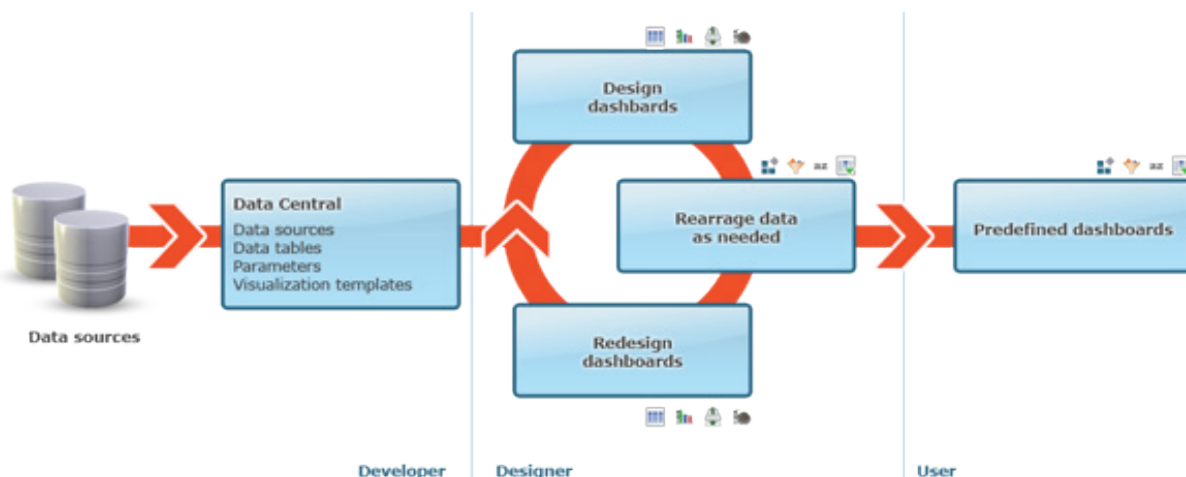

Traditional platforms have tools for development, publication and distribution of reports in various applications. Analyze Pro platform has all this in a web-based interface that can be accessed from all over the world.

It makes it easy for you as a customer, consultant or partner to maintenance dashboard and to do quick adjustments. This means the tools are constructed to actually follow you / your organization as your needs change.

Self Service Analytics – supporting the changes in reporting when execution action in your organization

Once the starting package is in place it will be easy for a customer to alter the solution, based on the changing business needs.

This is true self-service analytics. Since the business user / end-user can rearrange the data and also re- design dashboards (if given access).

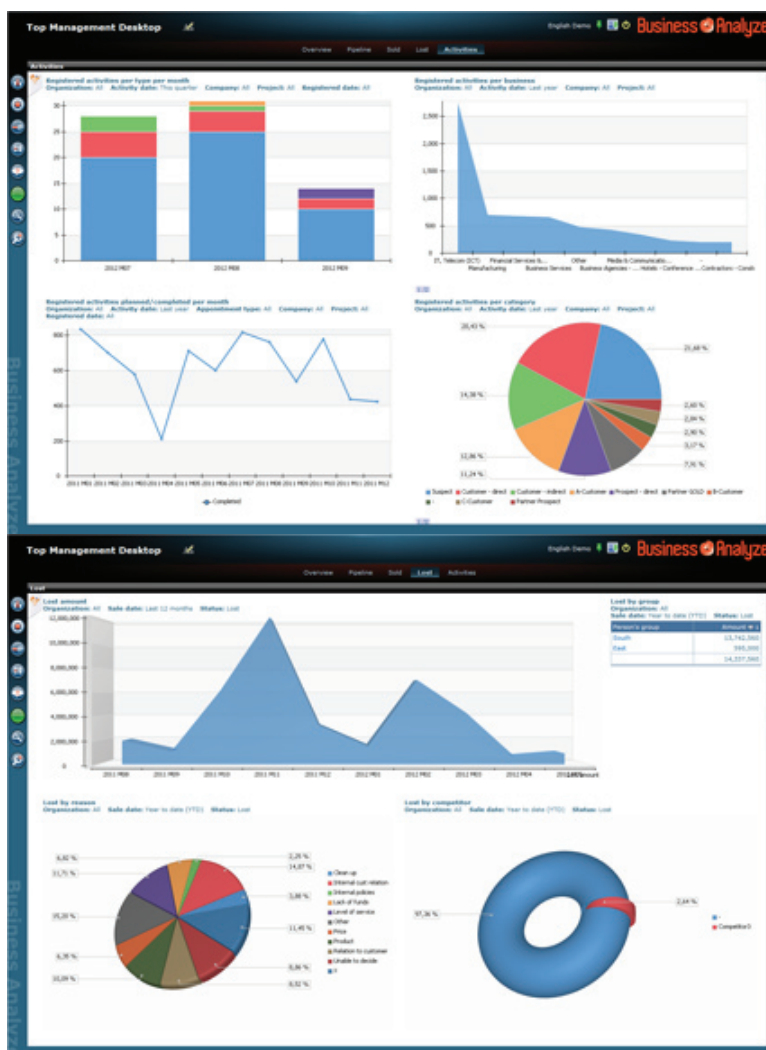

Illustrating the working process. When the first data central objects are created, the end-user can do the necessary changes, as showed in the loop.

"There are two important reasons, for which we have selected Nevron Software:
They supported all charting options we needed and their support response is fast and very helpful."

Business Analyze

real time answers

Reason to choose Nevron controls

During the project planning phase we did an evaluation of several charting components. After a long and detailed testing/ prototyping period, we selected Nevron Vision for .NET as the main charting solution for Analyze PRO since it fulfilled all of our needs.

Our product is based on an open architecture with usage of web-services and HTML standards, which makes it easy to integrate in most of today's systems. Nevron's charting solution was simple to integrate, powerful and rich in options and as a result, we are using both the charting and the gauge solution.

There are two important reasons, for which we have selected Nevron Software:

They supported all charting options we needed and their support response is fast and very helpful.
